KEYMACRO is designed to be a "keyboard-oriented" audio mixer for professional DJs. It allows you to do all things with a regular keyboard, such as beat, pitch, and time-stretching. The result is that you can mix any song on any style of music, in any order, and make a professional-quality CD or DVD. All you need is a keyboard (or MIDI instrument) and a regular personal computer. By means of the unique technology

invented by KeyMacro, a keyboard or MIDI instrument is no longer a tool for creating music but a real piece of music creation software. KeyMacro gives you full control over virtually every aspect of your song, allowing you to perform "live" from the keyboard, mixing your music as you record it. Moreover, KeyMacro enables you to save your songs into your personal "library" and to share them online with friends and family. You can even email your songs directly from KeyMacro to someone, and import your songs into a DJ software. You can choose between a floating or a side-panel-sized view of the view in the Editor View. Main features of KeyMacro : - Multi-track recording - Full editing with professional tools - Multiple song formats (WAV, MP3, AIFF, AIFF and WAV) - MIDI sequencer - Easy to use - Dozens of sound effects and samples - Complete and step-by-step tutorial - Tutorial window - Play-along: after each recorded key press you can hear the playback - Export MIDI music: save your music as MIDI files - Import MIDI music: import MIDI files from your music library - Export to CD/DVD: create a CD or DVD with your mix or export an MP3 file - Export CD/DVD to MP3: export MP3 files of your mix - Export to CD/DVD: create a CD or DVD with your mix - Export: export WAV files or MP3 files - Import: import WAV files or MP3 files from CD/DVD - Import: import MIDI files - Import: import WAV files or MP3 files - Import: import MIDI files - Add more tracks - Add fade in/out, panning, volume - Add fx: effects (delay, flanger, phaser, chorus, noise, dtmf, reverb), amplifiers, mixers (equalizers) 77a5ca646e

AAMS Audio Mastering System is a software application that enables you to view the waveform and the spectrum graph of your loaded songs. AAMS Audio Mastering System is able to perform two types of processing on your audio material: digital signal processing and optimization of the master balance. It is intended to enable you to make your recordings sound great. This free audio mastering software comes with a collection of 15 out of the box custom made reference mixes. These reference audio files can be accessed right from the application's main window. AAMS Auto Audio Mastering System can be used for optimizing and adjusting the sound quality of your recordings with the audio spectrum and waveform graph displayed on the software's interface. While it is not intended to be used for mastering your audio material, AAMS Auto Audio Mastering System is a handy tool for testing the sound quality of your audio files. It can be used to analyze the audio quality of songs and to find out whether your mix is prepared for releasing. AAMS Auto Audio Mastering System comes with a set of tools to help you create your CD, even if you don't know much about mastering. The initial benefit is the ability to analyze your audio and reveal the tonality, volume, noise or distortion in the song. The application provides with the ability to correct this. The integrated equalizer is intended to assist in changing the sound of your mix. AAMS Auto Audio Mastering System is intended to assist musicians and sound technicians in creating the final version of their mixes, ready to be released to the public. The audio mastering process enables you to prepare a mix for being distributed by fixing distractions in tonality, volume, noises or distortion. Getting accustomed to the application doesn't require you to be a professional mastering engineer, although some basic knowledge and some time is required to find out what each function does. The interface is definitely not the best we've seen, but it provides one-click access to all the options. It takes some time to set up your own reference master and this is done by allowing the program to analyze sets of songs with characteristics similar to what you plan on obtaining. Practically, you can give all your mixes the feel of your best song. AAMS Auto Audio Mastering System aims to help you test the sound quality of your audio materials. It analyzes MP3 or WAV source files and then uses them as a reference system for further input sounds. Alternatively, you can use one of the many reference files that the application comes with. The collection includes
