Typeshala for Windows 7 64bit Free Download India to double its share of global seafood exports by 2030 HBR discussion boards 2006-09-16 India, the world's fastest growing economy, is poised to double its seafood exports to the United States by 2030. The country is promoting a domestic industry that ships fish from a series of floating and fixed platforms, creating a competitive import-export industry. But for Indian suppliers to keep pace, they will need to modernize their trade relationships, the report says. To this end, the report recommends that India establish a forward-looking marketplace strategy for seafood exports to the U.S., involving the use of both export and import promotion instruments, a national seafood advisory board, and a seafood policy council. The report also recommends that the Indian government lead the development of an Asian-Pacific market structure for seafood. Osmotically induced in vitro germinal vesicle activation of grass carp oocytes. A germinal vesicle (GV) activation process was observed when the oocytes were suspended in hypotonic medium followed by an incubation in hypotonic medium containing 1.2 M D-sorbitol for various times at 17 +/- 1 degrees C. The oocytes that were not activated by hypotonic treatment showed a slight movement and had a greenish color with a dense cytoplasm. In contrast, the oocytes that were activated by hypotonic treatment and incubated for 5-10 min at 17 degrees C appeared to be enlarged and had a clear cytoplasm. Almost all of the activated oocytes had a GV and a first polar body. The percentage of activated oocytes, the size of the GV and the first polar body were recorded. The percentage of activated oocytes was 93.5%, and the average size of GV was 0.82 microns diameter. The cell
