He does not have the same hopes as his pro-European predecessor and nemesis, Theresa May, of becoming prime minister in a coalition with the Conservatives, despite the enthusiasm of some for an alternative government. May's hopes of succeeding David Cameron, who had said that he would not serve a third term, are likely to have evaporated after the poll. The expression of bFGF and FGFR-1 in the lungs was evaluated using immunohistochemistry. The levels of cytokines in the bronchoalveolar lavage fluid were determined using a cytometric bead array and a specific enzyme-linked immunosorbent assay. Compared with those of the healthy volunteers, both the amount and distribution of bFGF and FGFR-1 were up-regulated in the lungs of post-tuberculous bronchiectasis patients.
